

Cyclospora Update

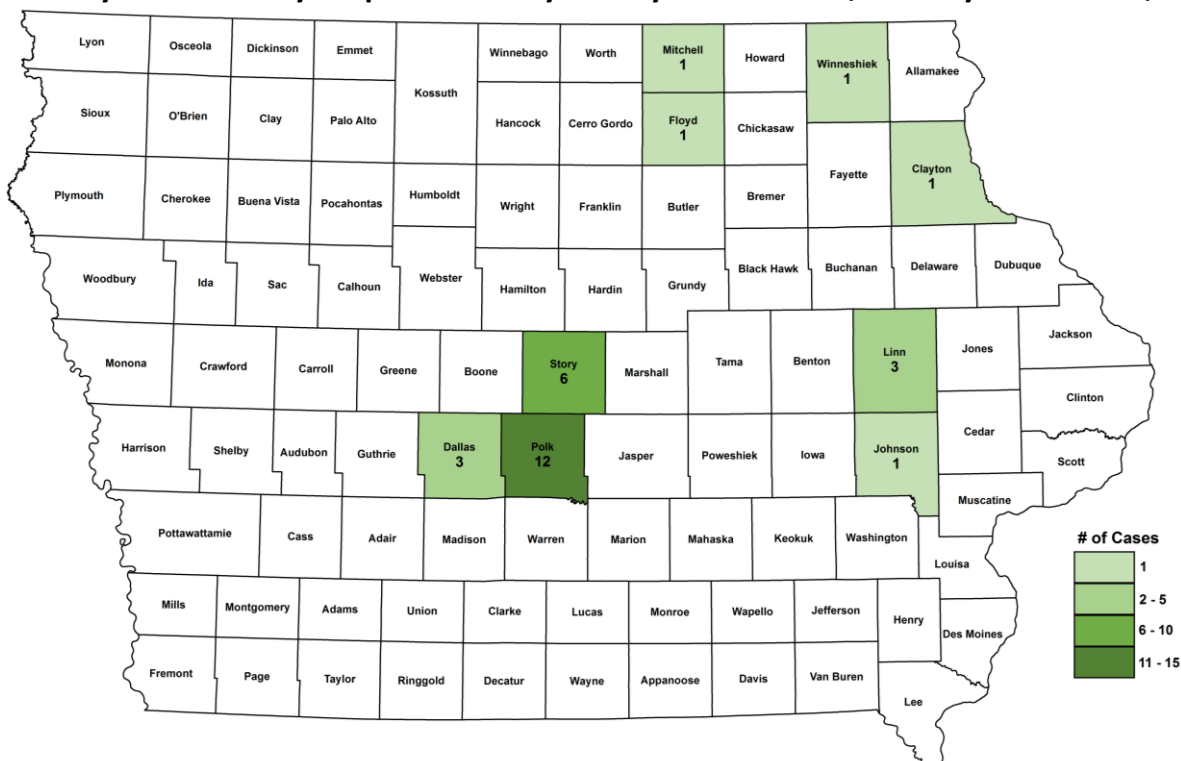

All data presented in this report are provisional and may change as additional reports are received

Published June 21, 2018

The Iowa Department of Public Health, in collaboration with local public health partners, the Iowa Department of Inspections and Appeals, and the State Hygienic Lab, is investigating an increasing number of *Cyclospora* infections. Since the beginning of the year, 29 *Cyclospora* infections have been reported in nine Iowa counties. Four of the cases in northeast Iowa are associated with an [outbreak](#) also impacting Wisconsin and Minnesota (associated with vegetable trays sold at Kwik Trip, Kwik Star and Tobacco Outlet stores). In addition, one case is associated with an outbreak involving the [Sonora Grill](#) in Minneapolis.

Laboratory confirmed cyclospora cases by county of residence, January 1 – June 21, 2018

Laboratory confirmed cases by week of symptoms onset*, January 1 – June 21, 2018

*Lab collection date used when onset date is unknown

This graph illustrates the date illness began. Note: 26 of the 29 illnesses have begun since mid-May.
